

Mhd Khair Khdroo Flutter Developer

✉ mkk11business@gmail.com ☎ +963 981310044 📍 Mazzeh, Damascus, Sy

PROFESSIONAL SUMMARY

Detail-oriented Flutter Developer with professional agency experience and a solid track record of building responsive, scalable mobile applications. Proficient in Dart, modern state management (**BLoC/Cubit, Riverpod**), and backend integrations (Firebase, Supabase, **Socket.io** 🗉, RESTful APIs). Adept at working across the full development lifecycle—from foundational architecture to real-time communication networks and secure payment integrations

PROFESSIONAL EXPERIENCE

Flutter Developer, Ultrawares 02/2026 – Present | Damascus, Syria

- Develop and maintain 4 mobile apps using Flutter and Dart.
- Use Riverpod and BLoC for scalable, predictable architecture.
- Implement low-latency communication with Socket.io for real-time updates.
- Collaborate with cross-functional teams to optimize performance and enhance user features.

PROJECTS

Mashena (Graduation Project), Driver Application 03/2026 – 09/2026

- **Description:** A dedicated mobile application designed for drivers to streamline routing, trip management, and real-time updates.
- **Key Achievements:** * Architected a responsive UI tailored for on-the-road usability.
- Integrated **Socket.io** 🗉 to establish persistent, real-time connections for instantaneous driver updates and active tracking.
- Leveraged **Bloc** for efficient, lightweight global state management and dependency injection.

Mwaeed, Service Booking Platform 03/2025 – 09/2025

- **Description:** A full-featured mobile platform allowing clients to discover local service providers, book appointments, and process secure payments seamlessly.
- **Key Achievements:**
- Architected a responsive, user-friendly client application with native support for Arabic language and RTL layouts.
- Built a complete authentication pipeline covering signup/login, phone/email verification, and password reset flows.
- Engineered intuitive discovery tools to let users seamlessly browse categories, filter providers, and schedule services.
- Integrated Stripe for secure payment processing and Firebase for real-time booking confirmation and update notifications.
- Leveraged BLoC (Cubit) state management to ensure a clean, maintainable, and scalable architecture.

Course Craft, Learning Management System (LMS) 03/2024 – 06/2024

- **Description:** An educational mobile platform enabling teachers to author courses and quizzes while allowing students to enroll, complete assessments, and collaborate.
- **Key Achievements:**
- Designed and built an intuitive course creation module for educators to effortlessly upload and manage educational content.
- Integrated BLoC state management to handle complex application states, including user authentication and dynamic course enrollment flows.
- Implemented a real-time messaging system using Firebase to facilitate direct communication between students and instructors

Swift, Merchant & Client App 05/2025 – 09/2025

- **Description:** A dual-sided e-commerce marketplace empowering merchants to manage inventory while providing customers with a seamless shopping experience.
- **Key Achievements:**
- Built full cart management, search functionality, and order processing workflows utilizing Supabase.
- Designed the application with a scalable clean architecture supporting full localization (English/Arabic)

EDUCATION

Information Technology Engineering, *Damascus University*

SKILLS & ABILITIES

Technical Skills

Flutter, Dart , **Riverpod**, BLoC Architecture (Cubit) ,
Socket.io  , API Integration , Firebase , Supabase , MVVM
Pattern , Clean Architecture, Git

Soft Skills

Problem-solving , Teamwork & Collaboration , Effective
Communication , Time Management , Adaptability

LANGUAGES

Arabic

Native

English

Intermediate
